

Sprint 1 –Test Cases

Test Case No	Test Case	Outcome	Status
1	As an International Student, I want to upload my I-20 document, so that I can view my basic information (Name, Date of Birth).	The system extracts and displays the Name and Date of Birth from the uploaded document.	Completed
2	As a developer, I want to implement the PDF upload functionality on the frontend and backend, so that students can upload their documents.	Backend successfully processes uploaded documents, handling the files appropriately.	Completed
3	As a developer, I want to implement basic parsing functionality for I-20 documents, so that key fields (Name, DoB) can be extracted.	Extracted information is displayed in the frontend user interface. System parses I-20 documents and correctly extracts Name and Date of Birth.	Completed
4	As a developer, I want to ensure the application has error handling during the document upload process, so that users receive appropriate feedback for failed uploads.	The system logs errors for troubleshooting purposes.	Completed
5	As a developer, I want to set up the basic structure of the Flask backend, so that I can manage file uploads and communication between the frontend and backend.	Backend and frontend communicate successfully, with files uploading and processing properly.	Completed
